

# Friday 5<sup>th</sup> December 2025 - Optional home learning for Honeybees.

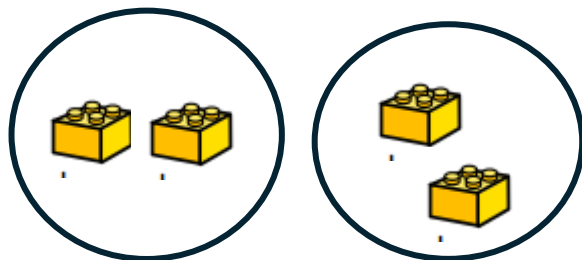

Dear Honeybees,

Enjoy having this surprise day at home. If you can, please complete the short tasks below. If you would like to, you can bring in your learning (or your grown ups can send a photo if they wish).

1. Gather 4 objects. Separate your objects into two groups. Can you find half?

Example:

I have 4 Lego bricks 

I can put them into two **equal** groups. Half of 4 is 2.

Then try with 6, 8, 10, 12, 14, 16 etc.

**Challenge** - try with an odd number of objects. What did you discover?

2. Think about your morning. Can you write some sentences using First, next, then and finally?

Example:

First, I got up.

Next, I got ready for work.

Then, I arrived at work.

Finally, the school was closed so I went home.

**Remember - Say your sentence before you write it. Capital letter and full stop. Reread to check your sentence.**

3. Can you teach someone at home our months of the year song? OR record yourself singing it.

**Challenge - can you tell your grown-up which months are in each season?**

Have a wonderful day 😊

From Mrs Lea
